

AUTOMATIC LOOP SETTING UNIT

NEW LOOP ALIGNMENT SYSTEM

NEW COLOURED
7" HI-RES
TOUCH SCREEN
PANEL

NEW 400W
MOTORS

COMPLETELY
NEW CPU

Equipped with a completely new 7" coloured touch screen panel which is now totally user-friendly (the easiest to-use ever made), new presser foot, new loop aligner system, new electronic and new software fully in-house developed by Vi.Be.Mac.

EV 9 ELECTRONIC FEATURES:

- New 7" Colored Super fast touch screen panel;
- New CPU assures a much better software management, a better seam quality, easier adjustments and patterns, more precision, more customizable and more fashion options;
- Updates through USB or Internet (remote control);
- Preview of new patterns visible on the screen;
- Error History Reporting;
- Possibility to work without the touch Screen Panel in case of breakdown;
- Auto-diagnostic system to avoid errors;
- Control KEY to allow the machine manager ONLY to change the unit parameters (operator will not be able to sabot/change anything);

EV 9 MECHANICAL IMPROVEMENTS:

- New 400W motors for the X & Y movements;
- New presser foot with extra pressure and less flexure, besides lower barycenter;
- Counter-weight device to counterbalance the presser foot thrust and keep it always the right position - Less usury of X&Y carriage;
- New thread wiper to facilitate the needle threading;
- New LOOP ALIGNER SYSTEM to avoid the loop mispositioning on the fabric, especially for the folded tails (now always aligned);
